

## The Issue

Kerr Construction company is seeking a variance to allow the operation of an asphalt plant during the night in our residential neighborhood. This presents a risk to our aquifer that provides drinking water to everyone on this hill.

If allowed to operate, the residents living nearby and our aquifer will be exposed to pollutants including harmful chemicals like sulfur dioxide and volatile organic compounds.

Moreover, the noise generated from the plant's operation during ungodly hours will disturb our sleep and infringe on our right to peace and quiet. Stopping this variance is critical for our health, our children, our peace of mind, and our right to a quiet, safe, residential environment.

We implore local authorities to deny Kerr Construction's request for night-time operation. Please help protect our neighborhood by signing this petition to deny the variance. We all deserve the right to a peaceful night's sleep in our homes.
